” 1.4.10, April 14, 2009: “Photopia is no longer available as an update. With the introduction of the Creative Suite 5 (CS5), Photoshop CC and ProShow Elements 6 (PSE6), Photopia is no longer necessary as a standalone product. PS Elements users can continue to use Photopia as a slide show viewer for DVDs and any slide show format that they choose to output to, as they have done with previous versions of Photopia.” 1.4.10, November 17, 2009: “Photopia is no longer available for purchase as a standalone product. With the introduction of Creative Suite 5, Photoshop CC and ProShow Elements 8 (PSE8), Photopia is no longer necessary as a standalone product. PS Elements users can continue to use Photopia as a slide show viewer for DVDs and any slide show format that they choose to output to, as they have done with previous versions of Photopia.” 1.4.10, December 20, 2009: “Photopia is no longer available as a standalone product. With the introduction of Creative Suite 5, Photoshop CC and ProShow Elements 8 (PSE8), Photopia is no longer necessary as a standalone product. PS Elements users can continue to use Photopia as a slide show viewer for DVDs and any slide show format that they choose to output to, as they have done with previous versions of Photopia.” Photopia does not work with Windows Vista/7. Photopia is the default Adobe slideshow viewer on Macintosh computers.
